

# GUILHERME DE SOUZA CRUZ

Junior Developer

Conj. Hab. Pe. Manoel da Nóbrega – SP, 03590-200 • [contato.guilhermescruz@gmail.com](mailto:contato.guilhermescruz@gmail.com) • [GitHub.com](https://github.com) • [LinkedIn.com](https://www.linkedin.com) • [Portfolio](#)

## OBJECTIVE

Seeking an opportunity as a Developer to work in web development and contribute to real-world solutions. I bring hands-on experience with React, Node.js, TypeScript, REST APIs, and authentication, combined with exposure to production systems gained through ERP support. I want to apply this foundation within a collaborative team, contributing quality code and continuously growing as a professional.

## SKILLS

**Programming Languages:** JavaScript, TypeScript, Java, Python, PHP, SQL

**Front-end:** React, React Router, Vite, HTML5, CSS3, SPA, and responsive design

**Back-end:** Node.js, REST APIs (RESTful), WebSocket, JWT authentication, OOP

**Databases:** MySQL, Oracle, relational databases, data modeling

**Version Control & Deployment:** Git, GitHub, version control, CI/CD, continuous deployment (Vercel, Render)

**Methodologies & Practices:** Agile methodologies (Scrum/Kanban), Clean Code, software testing, software quality

**Soft Skills:** analytical and investigative mindset, problem-solving, fast learner, collaboration, proactivity, and reliability

**Languages:** Portuguese (native), English (intermediate)

## FEATURED PROJECTS

**Auth Service** — Python • FastAPI • JWT

Authentication and authorization service focused on security, user management, and JWT token issuance/validation, exposed via a REST API with an integrated frontend and containerized production deployment.

**Web Chat** — Node.js • JavaScript • WebSocket

Real-time chat application built with WebSocket, admin-managed rooms, message moderation, and privacy by default, since nothing is persisted on the server.

**Financial Control** — React • JavaScript • Vite

Personal finance management dashboard built in React, featuring income/expense tracking, distribution charts, light/dark themes, and data export/import in Excel, PDF, Word, and CSV.

## PROFESSIONAL EXPERIENCE

### WISE SYSTEM

Technical Support Analyst (Helpdesk), from Intern to Permanent Hire (CLT)

Tatuapé, São Paulo

Apr. 2025 – Present

#### HIGHLIGHTS

- Promoted from **Intern to full-time employee (CLT) in under a year**, with expanded responsibilities and technical autonomy.
- Homologation of invoices and bank payment slips (boletos)** and functional support for the **Finance and Billing** modules, with solid command of the underlying business rules.
- Investigative approach to problem-solving: root-cause analysis of incidents and impact assessment across the software ecosystem, raising the quality bar for deliverables from both the support and development teams.

#### RESPONSIBILITIES

- Analysis of **CNAB files (remittance and return)** and bank reconciliation; **Accounts Payable and Receivable** routines (entries, settlements, collections) and correction of tax-related errors.
- New-hire **internal training** (onboarding and skill-building) and **online training for clients** on the system's modules.
- ServiceDesk ticket management with full traceability, technical escalation of systemic failures, and proposed improvements to reduce recurrence.

## EDUCATION

### UNIVERSIDADE CRUZEIRO DO SUL

Bachelor's Degree in Computer Science - In Progress

Anália Franco, São Paulo

2023 - 2026

### ETEC VILA FORMOSA

High School Diploma and Technical Degree in Systems Development - Completed

Jardim Vila Formosa, São Paulo

2020 - 2022

## COURSES AND CERTIFICATIONS

- Introduction to Cybersecurity** (Cisco Networking Academy, Apr. 2026): Cybersecurity fundamentals, threat analysis and risk management, corporate network security, data privacy and protection, and incident response.
- CS50 - Computer Science (Harvard/CS50)** (Fundação Estudar, Dec. 2024): Programming, algorithms and data structures, memory and resource management, SQL and database modeling, web development, and AI fundamentals.
- Discover Track** (Rocketseat, Mar. 2024): Front-end and back-end development, web and mobile applications, modern JavaScript, and problem-solving.
- Data Modeling** (Fundação Bradesco, 2023): Relational databases and SQL, conceptual, logical, and physical modeling, and data analysis.
- Software Quality** (Estudar, Nov. 2022): Software testing, test automation and documentation, and quality assurance.

## PORTFOLIO

Full portfolio featuring hands-on projects in JavaScript, TypeScript, React, Node.js, and Python, including REST APIs, JWT authentication, real-time applications with WebSocket, and data integrations, all deployed to production. [View Portfolio - gcruz.dev.br.](#)
